TsamThis is just a pamphlet. It doesn't have any photos and the print is very small. I don't believe it is a good value for your money, especially with the addition of shipping and handling. The Eyewitness Guide to London is much more informative and entertaining.0 of 0 people found the following review helpful. As Handy As It Gets...By HMS WarspiteThere are many travel guides to the great City of London, but none that are quite as handy as "TripBuilder London" for sheer portability and convenience. "TripBuilder London" is pamphlet-sized and will easily fit into a jacket pocket or a purse. It is just the thing once you get to London and are ready to actually see the sights."TripBuilder London" includes a fold-out map of central London, an Underground schematic with all the tube stops, and a briefing listing and grading of the most popular attractions, ranging from Buckingham Palace through Harrods to such lesser known marvels as the Victoria and Albert Museum. Each attraction gets a short paragraph of description, its operating hours, and some hints on how to get there. The grading system identifies each attraction as, respectively, an historic landmark, a best museum, a child's attraction, a hidden treasure, or a location for superior shopping.This handy guide may no longer be in print, but it is highly recommended as a handy guide to touring in London and well worth tracking down. The cautious traveler may wish to double-check times and entry costs against websites or another guide, in case they have changed.0 of 0 people found the following review helpful. The only quick-reference guide you'll needBy A CustomerFor a whirlwind tour of London, the Tripbuilder series is the only guide anyone needs.First of all, there's a matter of convenience --- the size of this booklet is perfect for stowing in a jacket, or a purse.Secondly, it's chockful of great information. Points of interest are color-coded to indicate historical significance, if it's appropriate and fun for kids, etc. Best of all, these are all identified, by number, on the colorful map which also provides information on public transportation terminals.The text is so well-written, and incorporates historical perspectives as well as humorous comments on what we're seeing. The tips on what to do, where to go, etc. are also great.The Tripbuilder is so recent that it even included reference to the London Eye (gigantic ferris wheel to commemorate the Millennium, courtesy of British Airways).We felt quite at home with the Tripbuilder, during our lengthy walks as well as our journeys via the subways. The Tripbuilder has been a god-send to us during our trips to various European cities --- and I sincerely hope there will be more cities covered as I will only get these books as my pocket tour guides.

Visit one of the world's oldest (and prettiest) gardens, take in a classical concert at a small church near the Houses of Parliament or view one of the best private art collections we've ever seen. It's all in the London TripBuilder! * Informative sight descriptions unearth little-known anecdotes, unique facts, and practical advice (like when to go, how to get there and what it will cost). * Color coding tells you whether a sight is a best museum, hidden treasure, historic landmark, superior shopping spot, or a great place to take the kids. * DETAILED FOLD-OUT MAP shows exactly where each color-coded sight is located. * Special Suggestions to make your trip even more memorable. * Lightweight, easy to carry and a great value.

A great trip planner. -- US News World ReportExtremely Useful. -- The New York TimesInformation you won't find in most guidebooks. -- Travel Leisure
