By California Flying Pig
The Heikell series is the bible of boaters in the Mediterranean. This particular book covers Turkey and Cyprus, but others cover other parts of the Mediterranean. Heikell gives you all the information you need if you are boating in the Turkey/Cyprus area, from general boating and safety tips to specific descriptions of ports and anchorages (including such information as how to contact, number of visitor berths, amenities) and descriptions of places to see near various ports and harbors. It's the only source for much of this valuable information. It's a pricey book but worth it.

By Anthony J. Hitchings
Good book, it helped a lot for my advance planning a Bareboat vacation on the Lycian Coast a few years ago. I cut the book apart and took the relevant part of the book with me.

This 7th edition of Rod Heikell's guide to the coast of Turkey from the Bosphorus to the Syrian border and Cyprus has been revised following the author's visits to the coasts during 2005. Details of new yacht harbours have been collected and the data on the existing entries has been updated and improved throughout. The only Turkish Waters Pilot guide written in English, it sets the standards for both pilotage and descriptions of places to visit and see. There are many new plans and new photographs. This edition sees a reworked introduction which takes accounts of changing cruising patterns and interests.
