Touring Club Italiano : Umbria (English and Italian Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Umbria (English and Italian Edition):

0 of 1 people found the following review helpful. not what we expected. By Gerivery small, no english. We were hoping to really see and be able to find backroads. Not so much. 1 of 2 people found the following review helpful. Five Stars By dagny excellent and easy to read

Touring Club Italiano produces high quality maps of all scales and regions. Here we present the Umbria the Marches map at a scale of 1:200,000. This map is perfect for touring - either on your own by car or with a group by bus or train. It also makes an excellent reference map of the area. In our opinion, Touring Club Italiano makes the best maps of Italy. The maps are published on light but durable, waterproof and tear-resistant plastic paper, with an index and a distance table on the one side of page and the map on the other side of the page. The map has subtle but effective relief shading to present the topography. Names of mountain ranges, valleys, peaks, etc. are shown and national parks and other protected areas are prominently highlighted. The roads themselves are presented in great detail, from motorways to dirt tracks navigable only with difficulty. Minor roads are very clear and easy to read and show the twists and turns across any mountainous terrain. Steep roads are annotated with three levels of gradient markings. Scenic routes are highlighted. The rail system is shown with stations and level crossings including ferry routes. Cities, towns and villages of tourist interest are indicated, with symbols showing monuments, castles, churches, etc. In mountainous areas, cable car lines, chair lifts, etc. are marked. The maps have no geographical co-ordinates. The map legend is presented in several languages, one of which is English.
