By Book Addicted Walking through London with this book in hand was very exciting, not sure because of the book or because I was finally there! The book is great by providing a condensed snapshot of interesting facts. I had a little trouble though locating the exact spots they refer to (as the perfectionist I am I had to make sure to be standing at exactly the spot referenced. Lol), so I think it

would have added value (exponentially) if the book presented pictures as part of the map. For instance, when I was at the Tower of London, if I misinterpreted the map I found myself starting the walk from the beginning just because I got "lost" following the steps. All and all, it was certainly fun! I took my own pics of the the Points of Interest and created a video that my guests will be able to follow by reading the same book! 0 of 0 people found the following review helpful.
