Ordnance Survey : Western Scotland the Western Isles (OS Road 2) (OS Road Map) before purchasing it in

order to gauge whether or not it would be worth my time, and all praised Western Scotland the Western Isles (OS Road 2) (OS Road Map):

3 of 3 people found the following review helpful. The West Highlands and Islands...By HMS Warspite Ordnance Survey publishes maps of the United Kingdom at a variety of scales. The Road Traveler Series provides regional coverage at a 1:250,000 scale; there are a total of eight sheets for the whole of Britain. Road Travel Map # 2 is "Western Scotland the Western Isles." The coverage of Map #2 begins on its south margin at Greenock (just north of Glasgow), goes north to Durness and Cape Wrath in the North of Scotland, and sufficiently west to pick up the islands of the Inner and Outer Hebrides. The scale and multicolored presentation permit road planning and navigation between the major population centers and an appreciation of the terrain. The map includes a handy place names index to locate any of the numerous small towns and villages in the West Highlands. Some of the outer islands are covered by inset maps. Map symbology is sufficiently detailed to point out items of tourist interest such as castles, vistas, and camping grounds. The map is not sufficient for cross-country or over water navigation. There are other Ordnance Survey products for those needs. "Ordnance Survey Road Travel Map #2: Western Scotland the Western Isles" is very highly recommended to travelers and others needing a large scale map for planning and navigation purposes.

The OS Roadmaps series are single sided folded maps, the 8 maps provide GB 1: 250 000 coverage to enable the end user to navigate and plan their road journey. The maps include all motorways, primary routes and A roads plus detailed tourist information including National Parks, Country Parks and World Heritage sites and a useful town and city gazetteer. The eight maps in the series are Northern Scotland, Orkney Shetland, Western Scotland and the Western Isles, Southern Scotland and Northumberland, Northern England, East Midlands and East Anglia, Wales/Cymru and West Midlands, South West England and South East England.

About the Author Ordnance Survey is Britain's national mapping agency, responsible for the official, definitive mapping of the whole country. They produce and market a wide range of maps for educational and leisure purposes, as well as producing computer data products for government, business and administrative use.
