Karel Tomei : XL.BE: Flying over Belgium before purchasing it in order to gage whether or not it would be worth my time, and all praised XL.BE: Flying over Belgium:

Karel Tomei has been flying over Belgium for years. The result, this photography book, is unequalled and gorgeous. From the coast – over art cities such as Bruges, Ghent, Antwerp, Mechelen and Brussels, to the heart of Wallonia, with Liège, the beautiful Ardennes and the southernmost point of the country, Karel has made unique aerial photographs. Each one is a gem. Tomei has an eye for what makes a landscape special. Colors, composition, details, famous landmarks are given a new, interesting perspective through his unique approach. As a consequence of which this book is a party from the first to the last page. Tomei has a special relationship with Belgium. As a true Burgundian, he loves the country, in which he has been living for years. Bringing us Belgium from the sky proved to be a special challenge,

taking into account the unpredictable weather of the country.
