Laurence Tetley : Yorkshire Dales Angler's Guide (Cicerone Guide) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Yorkshire Dales Angler's Guide (Cicerone Guide):

A comprehensive guidebook for anglers in the Yorkshire Dales of northern England. This guide tells you where to fish, how and where to obtain licences, where to buy fishing tackle, what baits to use and even how to stay safe at the water's edge. The new Yorkshire Dales Angler's Guide is the most comprehensive guide to fishing in the Yorkshire Dales and the Vale of York ever produced. It lists in detail the numerous fishing opportunities that exist on 24 rivers and over 90 still waters in this beautiful area, and also gives full details of angling clubs and fishing tackle shops. To help you find the day-ticket waters, maps are also included. Much of the fishing in Yorkshire is controlled by angling clubs and details of 65 are listed. Some are big, some small, some exclusive and some not. With visitors to the area in mind, the guide includes a section on fishing tackle shops: where to find them, when they're open, the tackle and bait they stock and, of course, the club season books and temporary membership tickets that they sell.

About the Author Laurence Tetley was born in the Yorkshire Dales and has fished extensively throughout Yorkshire, the Lake District and Cumbria for most of his life. Recently he wrote *The Yorkshire Dales Anglers' Guide* and he has now used his extensive knowledge of the area to produce this sister publication. He knows the sport intimately and has also fished in distant waters. During a spell in the Merchant Navy he cast a line as far afield as Australia, South Africa and Canada. He has also lived in Southampton where, during a period as Principal Lecturer at the Institute of Higher Education, he found time to write *The Central Southern Angling Guide*. He is now retired and lives once again in the Yorkshire Dales.
